

REMARKS

In response to the Notice of Allowability dated October 17, 2008, the Applicant acknowledges the Examiner's statement of reasons for Allowability. Applicant acknowledges that claims 1, 3, 5-12, 14 and 16-20 are allowable.

In reviewing the specification, Applicant has identified several minor spelling and/or syntax errors as follows:

In paragraph [0034], 2nd sentence from bottom: 53 lip is a commonly used halftone screen frequency for printing at a resolution of 300 spi. "Lip" has been amended to refer properly to "lpi". The word "Lip" was merely a typo.

In Paragraph [0038] last sentence: For example, if the separations depicted in FIG. 3 were to be imaged utilizing the inks specified (consider the white area to be the "on" pixels), the features would appear similar to that outlined via block 300 contrasting a white area 305 versus a dark or black area 302 and a dark or black area 310 versus a white area 308. 306 is the white area in FIG. 3. Thus, "305" has been deleted and replaced by "306" as indicated by the amendments provided herein in order to properly match what is shown in FIG. 3. Applicant submits that "305" was merely a typo and should have been "306".

In Paragraph [0050] 4th sentence down: First, a software module may list the constants, data types, variable, routines and the like ~~that~~ that can be accessed by other modules or routines. One of the "that" has been deleted by amendment. Applicant submits that the extra "that" was a typo.

The amendments indicated herein are therefore submitted only for correcting these minor errors, and do not constitute new matter. Such amendments also do not affect the disclosure, the scope of any claim, and do not add a claim. Applicant respectfully requests entry of these amendments prior to issuance and publication of the patent based on the above-referenced patent application.

Respectfully submitted,

Dated: November 3, 2008
